

CARE & MAINTENANCE

Ensuring the longevity of your ASP bathtub is important to us. Please adhere to these guidelines for proper care and maintenance:

To clean your ASP product

Utilize a soft cloth or sponge along with mild soap or detergent mixed with water. Avoid abrasive or scouring pads as they can diminish the glossy surface. Refrain from using abrasive cleaners, disinfectants, aerosol cleaners, or those containing bleach or ammonia.

Upkeep

For upkeep, you can periodically polish your bath using a high-quality automotive polish or a product like 'Brasso'. Be sure to rinse off any residue with warm water before using the bath.

Light scratches

For light scratches, gently sand the affected area with 1200 grit water-based sandpaper and then polish it with automotive polish or 'Brasso' to restore the gloss finish. For deep scratches, chips, or significant burn marks, please reach out to us for personalized advice.

We appreciate your choice of ASP for your bathtub needs.
